

# Sebastián Vélez Ramírez

## Senior .NET Developer | Software Engineering | Microservices & Azure

Risaralda, Colombia | sebasp1234@utp.edu.co

LinkedIn: [co.linkedin.com/in/sebastian-velez-ramirez](https://co.linkedin.com/in/sebastian-velez-ramirez) | GitHub: [github.com/luok4n](https://github.com/luok4n)

### PROFESSIONAL SUMMARY

Software Engineer and Senior .NET Developer with 8+ years of experience building and delivering scalable software solutions across the energy, fintech, real estate, public health, and education sectors. Strong experience in C#, .NET, ASP.NET Core, REST APIs, microservices, SQL Server, and Microsoft Azure, complemented by hands-on experience with Python, Java, React, PostgreSQL, Angular, PHP, and Laravel. Experienced in software architecture, cloud applications, asynchronous messaging, CI/CD, automated testing, and Agile development practices.

### PROFESSIONAL EXPERIENCE

#### Senior .NET Developer – Adagotech S.A.S.

Dec 2022 – Jul 2026

- Designed and developed backend solutions and microservices using C#, .NET, ASP.NET Core, Entity Framework Core, and SQL Server.
- Designed and implemented microservices-based architectures and RESTful APIs for mission-critical applications.
- Built and integrated asynchronous communication and event-driven workflows using Azure Service Bus.
- Developed and maintained cloud-native solutions using Azure App Services, Azure Functions, Azure Storage, Key Vault, and Azure DevOps.
- Implemented CI/CD pipelines and automated deployment processes using Azure DevOps.
- Applied Clean Architecture, SOLID principles, dependency injection, design patterns, and automated testing to improve maintainability and code quality.
- Performed code reviews, technical planning, effort estimation, and architectural decisions.
- Mentored developers and contributed to engineering standards and technical documentation.

#### Software Engineer (Freelance) – AES Chivor & Cía. S.C.A. E.S.P.

Mar 2022 – Dec 2022

- Designed and developed backend services using C#, .NET Core, ASP.NET Core, and SQL Server for the MOA platform supporting Colombia's wholesale energy market.
- Developed REST APIs and integrations for business-critical energy management processes.
- Participated in the migration of legacy applications toward a modern microservices architecture.
- Implemented cloud-based solutions using Microsoft Azure and integrated distributed services.
- Optimized complex SQL Server queries and database operations, reducing response times by 30%.
- Participated in requirements analysis, technical design, impact analysis, and implementation of new functionalities.
- Applied software engineering practices including SOLID, dependency injection, clean code, code reviews, and automated testing.

#### Software Engineer – LendingFront

Jan 2022 – Dec 2022

- Developed and maintained the Marketplace BackOffice using Python, React, Redux, PostgreSQL, and AWS.
- Developed backend functionality and business logic using Python.
- Built and maintained frontend features using React and Redux.
- Designed and consumed APIs to integrate frontend applications with backend services.
- Implemented unit tests and mock data to improve software reliability and test coverage.
- Worked with PostgreSQL for data persistence and application queries.
- Participated in requirements analysis, technical estimation, code reviews, and sprint planning under SCRUM.
- Collaborated with cross-functional teams to deliver new features and production improvements.

#### Development Analyst – MVM Ingeniería de Software

Oct 2019 – Dec 2021

- Designed and developed cloud-based applications using C#, ASP.NET, .NET Core, Entity Framework, and SQL Server.
- Developed REST APIs and backend services following software engineering and integration best practices.
- Designed application integrations between internal and external systems using API-based architectures.
- Developed and maintained solutions deployed on Microsoft Azure.
- Used Azure services for application hosting, integration, storage, and cloud-based workloads.
- Applied Entity Framework Code First for database access and domain modeling.
- Worked on CHIVOR XM, developing backend functionality with .NET Core and SQL Server for energy management processes.
- Worked on SLANG, developing web functionality using ASP.NET and Angular for an online learning platform.
- Worked on Comfama, developing internal website management functionality and a platform for teachers to record student grades across courses.
- Participated in requirements analysis, technical design, development, testing, deployment, and production support.
- Improved development and deployment processes, reducing delivery time by 15%.

## Software Developer – Universidad Tecnológica de Pereira

Jan 2019 – Oct 2019

- Developed backend services using Java and Spring Boot for the RIAS programme (Rutas Integrales de Atención en Salud) of Colombia's Ministry of Health.
- Built frontend features and user interfaces using Angular.
- Designed and consumed REST APIs between the Angular frontend and the Spring Boot backend.
- Participated in requirements analysis, development, testing, and deployment.

## Software Developer – Woldev S.A.S.

Feb 2018 – Jan 2019

- Developed web applications and full-stack features using PHP, Laravel, Angular, and Python.
- Developed backend functionality and business logic using PHP and Laravel.
- Built frontend components and user interfaces using Angular.
- Designed and consumed REST APIs for communication between frontend and backend applications.
- Worked with databases and implemented data access functionality required by business applications.
- Developed the Teach at Home platform, contributing to both frontend and backend functionality.
- Translated client requirements into technical solutions and application features.
- Participated in debugging, maintenance, testing, and deployment of web applications.

## TECHNICAL SKILLS

---

**Languages:** C#, SQL, Python, Java, TypeScript, JavaScript, PHP

**Backend:** .NET, ASP.NET Core, Entity Framework Core, Spring Boot, Laravel, REST APIs

**Frontend:** Angular, React, Redux

**Architecture:** Microservices, Clean Architecture, DDD, CQRS, MVC, Event-Driven Architecture

**Cloud:** Microsoft Azure, AWS

**Azure:** App Service, Functions, Service Bus, Storage, Key Vault, Azure DevOps

**Databases:** SQL Server, PostgreSQL, Redis

**Messaging:** Azure Service Bus, asynchronous messaging, event-driven systems

**DevOps:** Azure DevOps, Docker, CI/CD, Git

**Testing:** xUnit, NUnit, Moq, Integration Testing

**Methodologies:** SCRUM, Kanban, Code Review, Technical Mentoring

## EDUCATION

---

B.Sc. in Systems and Computer Engineering — Universidad Tecnológica de Pereira

2018

## LANGUAGES

---

Spanish: Native | English: B2

## FEATURED PROJECTS

---

**Argos ONE** — Order-management platform for Cementos Argos, the Colombian multinational building-materials company. Support and module development in Angular, .NET, SQL Server, and Azure for operations across the United States, Colombia, and other countries.

**Linkvest** — Real estate co-investment platform in the U.S. Full-stack development with Angular, .NET, and SQL Server, including the monthly and quarterly reporting on each client's investments.

**AES Chivor MOA** — Platform for buying and selling energy in the Colombian wholesale market, including its Excel reporting. Backend in .NET and SQL Server, using a microservices architecture.
